17. A method of conditional transmission of a message to at least one recipient based upon the apparent emotional state of the writer, comprising the steps of:

- (a) receiving a proposed message from a writer along with a request to transmit the proposed message to proposed recipients;
  - (b) determining the emotional state of the writer;
- 7 (c) if the apparent emotional state of the writer is
  8 questionable, warning the writer and prompting the writer to
  9 confirm that the proposed message should be sent to the proposed
  10 recipients; and
- 11 (d) allowing transmission of the message to the recipients only
  12 upon confirmation by the writer that the message should be sent to
  13 the recipients.
- 1 18. The method of conditional transmission of a message
  2 according to claim 17, wherein said step of receiving a proposed
  3 message comprises monitoring input characteristics of the writer
  4 and said step of determining the emotional state of the writer
  5 comprises analyzing the input characteristics of the writer.

## Please add the following claims:

Aq

1

- 19. An information system, comprising:
- 2 an application program for engaging by a user;
- 3 means for monitoring factors relating to an emotional state of
- 4 the user; and

5 means for changing the operation of the application program

6 responsive to the emotional state of the user.

20. The information system of claim 19 wherein the means for monitoring the factors relating to the emotional state of the user includes means for monitoring characteristics of text inputted into the application program by the user.
